Work Experience

INSTRUCTOR

Freelance | June 2018- present

Teach the Ionic framework for developers and Software Engineers in two different companies: Ambient-IT and Clever Institut.
In class of 20 people, I have to explain my course and make exercises according to the students' level.

SOFTWARE ENGINEER

MKDM Partner | January 2018-present

Conception, architecture and lead development of mobile apps:

- App0: generator of apps, use a JSON file to construct itself - R&D
- LetsBro: create and manage events with friends
- All'in by Primonial : mobile app for a french company specialized in wealth management

FULL-STACK DEVELOPER - INTERN

ONEPOINT | September 2017-December 2017

Web and Mobile apps development for the Information Systems Department, using Ionic and Laravel.

I developed a website which display the status of IT infrastructure. It decreases the number of issues opened at the Helpdesk.

FULL-STACK DEVELOPER

EMOSI | July 2016-September 2016

Computer software in C# for photobooth:

- Conception based on specifications
 - Architecture
 - Development
- + 3 000 pictures taken with the software

INSTRUCTOR - VOLUNTEER

AGECA | September 2015-February 2016

Teach to 15 elderly people how to use Windows Operating System and famous websites.

People were satisfied and tests demonstrated that they know how to manipulate computers easier than before.
